

High wind-rated outdoor shades built for the toughest elements

Features

- Patented V-screen retention system, helps with years of smooth operation, no jamming
- With a unique snap-in tube and hidden bracket attachment, KAOS installs in half the time of traditional outdoor shading systems.
- Square Industrial Design with Matching Custom Powder Coat Colors
- Ceiling, Wall or Pocket mount options
- Outside, Inside and Inside with U-Channel, Inwall mounting variables
- Scales up to 24' wide
- 120v AC Power using stand alone remotes & integrates with SI Ecosystem
- Also works with Bond Bridge Pro.
- Multiple fabric options available for high winds

Min. & Max. measurements

Min. Width: 37.75"

- 575 Box up to 18' x 14' *
- 675 Box up to 24' x 16'
- Pocket up to 24' x 16'

Note: Fabric selection may limit the size of the shade, or force cassette size to the next size up; use the SI Flow Tool and SI Design Services with help determining shade size and fabric selection compatibility.

85, 84, 99 - rated @110mph wind rating. Internally tested.

- Omegatex
155mph wind and flying object rated. Tested by Twitchell

- ExScreen
Prevents Bugs from entering with 17 x 17 Mesh

Environment

Outdoor Environment

Methods of Control

Wireless Integration and control

- RF Remote Control
- Bond Bridge Pro
- Screen Innovations Ecosystem

Box shades

Measurement		
A	System Track Width (Max = 288")	(Inputted from FLOW)
B	Height (Max = 192")	(Inputted from FLOW)
C	Opening Width	$A - (E \times 2)$
D	Opening Height	$B - \approx 10"$
E	Track Width	3"
F	Track Depth	1.75"
G	Box Depth	575 = 5.63" 675 = 6.75"
		575 = 5.87" 675 = 6.94" (with brackets)
H	Box Height	575 = 6.29" 675 = 7.45"
		575 = 6.57" 675 = 7.74" (with brackets)

Pocket shades

Measurement		
A	Width (Max = 288")	(Inputted from FLOW)
B	Height (Max = 192")	(Inputted from FLOW)
C	Opening Width	$A - (E \times 2)$
D	Opening Height	$B - H$
E	Track Width	3"
F	Track Depth	1.75"
G	Pocket Width Recommended	7"
H	Pocket Height Recommended	12"

Ceiling Mount Brackets

Jamb Mount Brackets

Note: U-Channel not depicted and will sit outside the "A" measurement. Please reference Installation Instructions for more information.

Track mounting options

Inside Mount Between Posts

Tracks installed on the **inside** of the opening with U-channels

Measure the opening width from Post to Post. Measure the opening height from Floor to the Top of the Opening.

Note: When entering in FLOW it will: Deduct 1" from width for tracks and keep the Height as measured.

Outside Mount On Wall

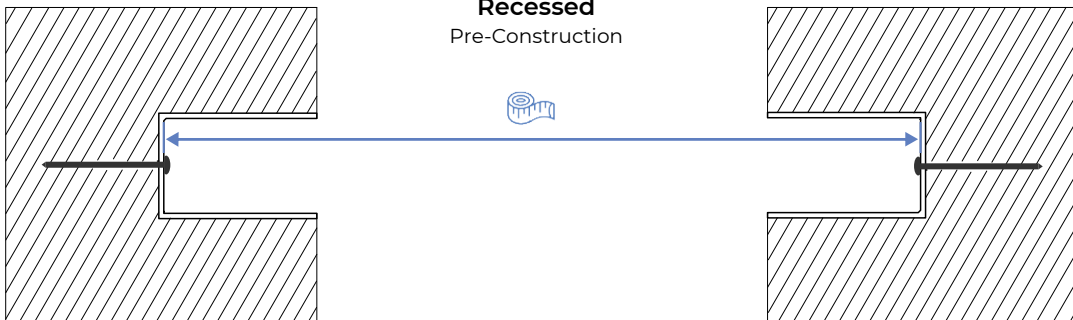

Tracks installed on the **outside** of the opening.

Measure the opening width from Post to Post. Measure the opening height from Floor to the Top of the Opening.

Note: When entering in FLOW it will: Add 7" to the width for the tracks and add 10" to height for the shade.

Recessed Pre-Construction

Only for Pocket Application types

Tracks **recessed** into the post utilizing U-Channels. Measure the opening width from inside of the U-Channel.
Measure the opening height from the Floor to the Top of the Pocket.

Note: When entering in FLOW it will: Deduct 1" to the width for the tracks and Keep the Height as measured.
